

KELLYLEE EVANS

Six albums deep and a Juno Award winner, Kellylee Evans is still shaking it up on *Come On*, her latest Decca album. The stylistic connoisseur has tackled everything from jazz to R&B and pop in such previous tasty classics as *Fight or Flight?* (*Help Me, Help You*), *Nina* - her Juno-winning tribute to the legendary Nina Simone - and *I Remember When*. Evans now pushes her muse firmly into the soulful pop territory with *Come On*: a wonderfully refreshing album about love and life that comes on the heels of two nearly career-ending accidents: a freak lightning strike in her Ottawa kitchen, and further effects of a concussion suffered during a fall at her home. Produced and co-written by Eric Legnini (Stefano Di Battista), this is post-romantic soul at its finest; a project of strong vision and great execution that signals the return of Kellylee Evans as a bold explorer and interpreter. It only gets better when you experience her live, in her element.
